

7) What methodology did you use (tools, experimental protocol, lab notes)?

8) Do you have any special instructions for viewing the data?

9) What file format is your data in?

10) What are the start and end dates of collection?

11) Where was your data gathered?

12) Is the data covered under a Creative Commons License?

13) Who owns the rights to the data?

14) When was/will the data be released? Are there embargo periods?

15) Does the data require any specific access controls?

Presentation

1) What other content should be linked to this data?

2) Describe the relationship between the data sets and related content.

3) What is the minimum bundle of data that someone would want to search or need to cite?

4) Are there any additional files that you'd like to attach to this data?
